# INTERFOR RESERVE PANELING

## BEST CHOICE FOR APPEARANCE

Interfor Reserve Pine Paneling is available in a variety of patterns and adds charm to any architectural style. Its tight knots, rich color and bright appearance make it the top choice of quality architects and builders.

## BEST CHOICE FOR ENVIRONMENT

Wood from responsible sources is by far the best building choice, and Interfor meets the highest environmental standards. Our Reserve products come from forests in Central Oregon that are selectively harvested, allowing young trees to reseed and mature naturally.

## BEST FOR QUALITY & PERFORMANCE

Interfor Reserve Pine Paneling features the finest trees from Oregon's central plateau, a region that produces some of the best Pine in North America. The paneling is meticulously sub-bundled and end-capped to protect the milling quality.

Pine is relatively unaffected by changes in humidity after drying so it is ideal for paneling and fine woodwork that requires close-fitting joints. It machines to a clear, smooth surface, and seasons beautifully with minimal splitting, cupping or warping.

Pine takes most finishes beautifully, including paint, stain, lacquer and varnish, and paints and stains do not raise the grain.

### 116/WP-4

### E&CB/WP-4

Above are Interfor's two most commonly run profiles diagrammed in 1x6.

\* Reserve is available in a variety of traditional patterns listed in the WWPA Standard Patterns Booklet and can be milled to custom profiles. Many patterns are reversible, offering a choice of pattern or surface finish in a single panel. (Note: Paneling boards are inspected and graded on the patterned or face side.)

## INSTALLATION AND FINISHING TIPS

- Reserve Pine Paneling is an excellent choice for many applications, including interior walls, ceilings, soffits, flooring and siding. It can be installed vertically, horizontally or diagonally.
- Knots should be sealed before painting to prevent them from bleeding through the finished surface.
- After the Pine has achieved equilibrium moisture content, and before it is installed, a coating on all surfaces is strongly recommended to help protect the wood from water penetration.
- Factory finishing, where available, is strongly recommended.

DISTRIBUTED BY:

Interfor is a growth-oriented lumber company with operations in Canada and the United States. The Company has annual production capacity of 3.1 billion board feet and offers one of the most diverse lines of lumber products to customers around the world.
