# INTERFOR INLAND HEM-FIR LUMBER

## BEST FOR QUALITY & PERFORMANCE

Interfor's Inland Hem-Fir\* is made up mainly of Western Hemlock, one of the most versatile softwood species. Its strength properties are comparable to D-Fir-L (N) making it an excellent lumber product for structural framing and trusses. Inland Hem-Fir is also easily pressure treated and can be used for decks and other outdoor uses.

Inland Hem-Fir is produced at Interfor's state-of-the-art mills in Adams Lake and Castlegar, BC. The lumber is precision manufactured and machine graded, creating top-quality products that won't let you down.

\* Note: Product is stamped Hem-Fir(N).

## BEST CHOICE FOR APPEARANCE

For those seeking wood with a very light color, Inland Hem-Fir is often considered the most desirable of the Western softwoods. It is as light or lighter in color than some of the Western Pines but stronger. This pitch-free product is very fine grained and even-textured with small inter-grown knots.

## BEST FOR ENVIRONMENT

Wood from responsible sources is by far the best building choice. Our Inland Hem-Fir lumber comes from forests independently certified to the Sustainable Forestry Initiative Inc. (SFI®) standard and is produced in mills with SFI and PEFC chain-of-custody.
