

# Interfor Elite Channel Siding

**Interfor Elite Channel** builds on the depth of our dry cedar STK family of products. Our Channel brings to life the classic look of board and batten siding in this resawn textured panel. Channel siding provides excellent weather protection and breathability, and offers a choice of both vertical and horizontal application. It combines the exceptional beauty and outstanding performance of Western Red Cedar with our consistent manufacturing excellence. As one of the world's largest suppliers of Western Red Cedar, Interfor has a reliable fiber supply to provide the perfect product when it is needed.

# INTERFOR ELITE CHANEL SIDING

## BEST CHOICE FOR APPEARANCE

Western Red Cedar offers beauty, rich color and exceptional building properties, and it is manufactured to exacting standards through our kiln and planer facilities. Properly finished and maintained, Western Red Cedar ages gracefully and lasts for years.

Interfor Elite Channel features straight, even grain; uniform texture, and sound, tight knots that will not fall out over time. It is reversible — saw-textured on one face and smooth on the other— and can be installed with either side exposed. The sawn face adds an appealing texture to the finished project.

## BEST FOR QUALITY & PERFORMANCE

One of the easiest woods to work, Western Red Cedar is dimensionally stable, lightweight, strong and versatile, and is naturally resistant to decay and insect damage. Interfor Channel Siding is easy to saw and glue, and accepts nails and other fasteners.

The cellular structure and insulation value of Western Red Cedar means that buildings featuring Cedar paneling, ceilings or siding are cooler in the summer and warmer in the winter. The wood also suppresses and absorbs sound.

Channel is widely used for its appearance and versatility. Interfor Channel Siding can be installed vertically, horizontally or diagonally; each method giving a distinctly different look.

## BEST FOR ENVIRONMENT

Wood from responsible sources is by far the best building choice. Wood grows naturally, it is recyclable and renewable, and its cellular structure captures and stores carbon. Interfor meets the highest environmental standards, and our quality Western Red Cedar comes from forests in British Columbia that are third-party certified.

Western Red Cedar's natural oils that act as preservatives protect against decay and insects so harmful chemical treatment is not needed.

IMPERIAL SIZE <i>nominal inches</i>	IMPERIAL SIZE <i>actual inches</i>	DRESSING	SEASONING	PIECES PER BUNDLE	PIECES PER PACKAGE	LENGTH <i>(feet)</i>
1 x 6	11/16 x 5 <sup>3</sup> / <sub>8</sub>	Smooth Face/ Resawn Back	Kiln-Dried	6	240	6-20 PTL
1 x 8	11/16 x 7 <sup>3</sup> / <sub>8</sub>	Smooth Face/ Resawn Back	Kiln-Dried	6	180	6-20 PTL

## FINISHING AND MAINTENANCE

- Western Red Cedar is pitch and resin-free, making it an excellent base for paints and stains.
- Western Red Cedar should never weather for more than two weeks before finishing. All finishes adhere and perform better when applied to fresh, unweathered wood.
- Power washers are not recommended for use on Western Red Cedar.
- For best results, Western Red Cedar should be coated on all sides before installation. Factory finishing, where available, is preferred.
- Corrosion-resistant nails such as hot-dipped galvanized aluminum and stainless steel are recommended.
- More detailed information about finishing and maintenance is available from the Western Red Cedar Lumber Association website at [www.realcedar.com/resources/brochures-literature/](http://www.realcedar.com/resources/brochures-literature/).

DISTRIBUTED BY:

Interfor is a growth-oriented lumber company with operations in Canada and the United States. The Company has annual production capacity of 3.1 billion board feet and offers one of the most diverse lines of lumber products to customers around the world.
