INTERFOR MSR LUMBER

BEST FOR QUALITY & PERFORMANCE

Interfor MSR (machine-stress rated) Lumber starts with the finest fiber, guaranteeing strength and stiffness, with consistent dimensional stability. It is manufactured with #1 Wane, providing a product that looks as good as it performs.

Our British Columbia mills at Adams Lake, Grand Forks and Castlegar manufacture MSR Lumber from Spruce/Pine/Fir (SPF), Douglas-Fir/Larch and Inland Hem-Fir(N). Our Meldrim and Preston, Georgia mills manufacture MSR Lumber from Southern Yellow Pine.

BEST FOR ENVIRONMENT

Wood from responsible sources is by far the best building choice. Interfor uses fiber from forest operations in British Columbia's Southern Interior and Eastern Georgia that meet our high environmental standards. Precision manufacturing and machine grading allow us to maximize MSR Lumber from our valuable forest resource.
