INTERFOR ELITE DECKING

BEST CHOICE FOR APPEARANCE

Interfor Elite Decking offers the ultimate in quality appearance, making it the product of choice for architects and builders. Western Red Cedar has beauty, rich color and exceptional building properties, and it is manufactured to exacting standards through our kiln and planer facilities. Properly finished and maintained, Western Red Cedar ages gracefully and lasts for years.

BEST FOR QUALITY & PERFORMANCE

One of the easiest woods to work with, Western Red Cedar is dimensionally stable, lightweight, strong and versatile, and is naturally resistant to decay and insect damage. Interfor Elite Decking is easy to saw and glue, and accepts nails and other fasteners.

Interfor Elite Decking is graded on all sides and knots are sound and tight so the entire product can be used. It is kiln-dried to allow for immediate finishing.

Interfor Elite Decking features straight, even grain and uniform texture. It is made with the highest quality raw materials to meet standards that set it apart from the competition, including:

- All knots are sound and tight.
- The maximum knot size is 2" for 2x4 & 2x6, and 2½" for 2x8.
- No holes and through soft knots are permitted.
- Wane is strictly limited and allowed on the reverse face only.

BEST FOR ENVIRONMENT

Wood from responsible sources is by far the best building choice. Wood grows naturally, it is recyclable and renewable, and its cellular structure captures and stores carbon. Interfor meets the highest environmental standards, and our Western Red Cedar comes from forests in British Columbia that are third-party certified.

Western Red Cedar's natural preservatives protect against decay and insects, so harmful chemical treatment is not needed.

IMPERIAL SIZE <i>nominal inches</i>	IMPERIAL SIZE <i>actual inches</i>	DRESSING	SEASONING	PIECES PER PACKAGE	LENGTH <i>(feet)</i>
2 x 4	1½ x 3½	S4S	KD	182	8-20 PTL
2 x 6	1½ x 5½	S4S	KD	112	8-20 PTL
2 x 8	1½ x 7¼	S4S	KD	84	8-20 PTL

FINISHING AND MAINTENANCE

- Western Red Cedar is pitch and resin-free, making it an excellent base for paints and stains.
- Western Red Cedar should never weather for more than two weeks before finishing. All finishes adhere and perform better when applied to fresh, unweathered wood.
- Power washers are not recommended for use on Western Red Cedar.
- For best results, Western Red Cedar should be coated on all sides before installation. Factory finishing, where available, is preferred.
- Corrosion-resistant nails such as hot-dipped galvanized aluminum and stainless steel are recommended.
- More detailed information about finishing and maintenance is available from the Western Red Cedar Lumber Association website at <https://www.realcedar.com/resources>

DISTRIBUTED BY:

Interfor is a growth-oriented lumber company with operations in Canada and the United States. The Company has annual production capacity of approximately 5.2 billion board feet and offers one of the most diverse lines of lumber products to customers around the world.
